Merlin Hat	each	\$10.00
Merlin Pin	each	\$ 3.50
Merlin T-shirt	each	\$???.??

- The Merlin line of Glow Plugs are made with the highest grade of materials. Manufactured in the USA to achieve the quality standards demanded by performance engines.
- The plugs are glass sealed, color-temperature coded (red-hot, green- medium, blue-cold) and the coils are a combination of platinum - rhodium.
- Plug bodies are plated with electroless nickel before the element is welded in. Copper gaskets are included.
- All plugs are quality-checked after welding.
- We manufacture spiral coils and flat coils (GloBee). The line also includes turbo plugs, turbine plugs, ½A plugs and nelson style plugs which can be connected to a glow driver.
- Our four- stroke plug has a coil that is shielded which gives smoother idle and a better transition. This plug also works great when the engine is inverted.
- Plugs are packaged individually or in quantities of 5 or 10.
